Education

Queensland University of Technology (QUT) <i>Biostatistics PhD</i> Title: High dimensional data for predicting inpatient falls. Supervisors: Dr Susanna Cramb, Prof Steven McPhail and Dr Ahmad Abdel-hafez	2020–Present
University of Newcastle <i>Medical Statistics MMedStat 6.88/7 GPA</i>	2019–2020
University of Queensland <i>Biomedical Science BSc and Honours (Neuroscience)</i> Title: The Role of Melatonin on Hippocampal Rhythmicity. Supervisors: Dr Oliver Rawashdeh and Dr Prasad Chunduri.	2015–2017

Employment

Senior Research Assistant <i>QUT (Australian Centre for Health Services Innovation and Centre for Data Science)</i> Several roles on continual basis for a range of projects where I mostly performed statistical analyses. For each appointment, supervisor's name and brief crux of the work: <ul style="list-style-type: none">– Nicole White; (1) Risk factors associated with COVID-19 with the COVID Critical Research Group.– Nicole White; (2) Pre-post trial analysis and risk model implementation projects at large hospital network.– Nicole White; (3) Meta-research on registered prediction model studies.– Gentry White; Development of (DSSP), an R package for fitting Bayesian spatial models by direct sampling.– Susanna Cramb; Spatial data analysis and visualisations with R for access to TBI care, presented as a shiny app.– Sanjeewa Kularatna; Health economics following policy change for Department of Veteran affairs.	Nov 2020–Present <i>Brisbane, Australia</i>
Research & Development Scientist <i>Ellume</i> <ul style="list-style-type: none">– Immunoassay and algorithm development for SARS-CoV-2 Serology rapid diagnostic test.– Redesigned the algorithm development workflow which improved generalisability and drastically reduced the time required to optimise.– Algorithm developed was used for FDA application for serological diagnostic and was the best performing diagnostic test approved by FDA.	Mar 2020–Aug 2020 <i>Brisbane, Australia</i>
Healthcare Data Analyst <i>City Fertility</i> <ul style="list-style-type: none">– Dashboard development using shiny and direct odbc for up-to-date analytics on KPIs.– Streamlining monthly reporting processes for marketing and services given using R.– Data acquisition, cleaning and statistical analysis for clinician-led research projects.– Clinical prediction model development for In-Vitro-Fertilisation treatment success.	Jun 2019–Mar 2020 <i>Brisbane, Australia</i>
Project Coordinator <i>UnitingCare Medical Imaging</i> <ul style="list-style-type: none">– Occupational lung disease and radiology research.– Questionnaire development with Qualtrics.– Data analysis and visualisations.– Applying and reporting to funding body.	Mar 2018–Jun 2019 <i>Brisbane, Australia</i>
Research Assistant <i>Ellume</i> <ul style="list-style-type: none">– Immunoassay development for influenza virus and Group A streptococcus rapid diagnostic test.– Worked in a team to rapidly iterate and develop medical devices.	Jan 2016–Mar 2018 <i>Brisbane, Australia</i>

Technical Skills

Proficient: R, Shiny, Data Analysis and Visualisation, Statistical Modelling, Functional Programming

Competent: Python, SQL, Machine Learning, Git & GitHub, Object-Oriented Programming

Novice: Dask, PyTorch

Statistical Software Development

predictNMB

pkgdown site

- A wrapper R package which allows the user to quickly perform Monte Carlo simulations to estimate the cost-effectiveness of using a prediction model to assign a healthcare intervention.
- Can be used to determine whether or when a clinical prediction model or clinical decision support system may be feasible before development or implementation.

DSSP

CRAN June 2022

- An R package that allows users to fit Bayesian spatial models.
- Draws samples from the direct sampling spatial prior model which is 100-1000 times faster than a traditional MCMC scheme.

simMetric

CRAN Jan 2022

- An R package that provides several useful metrics (and their Monte Carlo standard errors) for the assessment of statistical methods in simulation studies.
- This allows for easy integration with other simulation study frameworks and the tidyverse-style workflow.

circacompare

CRAN Feb 2021

- An R package that allows users to analyse circadian datasets using nonlinear regression models.
- Documented with a vignette; also available as a shiny app and in python.

Teaching

Queensland University of Technology

Brisbane, Australia

- MXN500: Statistical Data Analysis (Sessional Tutor) Semester 1, 2021
- SEB113: Quantitative Methods in Science (Sessional Tutor) Semester 2, 2021
- PUN108: Clinical Informatics for Intelligent Healthcare (Guest Lecturer) Semester 2, 2021

Selected Papers

1. **R Parsons**, RD Blythe, SM Cramb, SM McPhail **Gerontology (2022)**
Inpatient Fall Prediction Models: A Scoping Review.
2. R Blythe, **Parsons R**, NM White, D Cook, SM McPhail **BMJ Qual Saf (2022)**
A scoping review of real-time automated clinical deterioration alerts and evidence of impacts on hospitalised patient outcomes.
3. LVM de Assis, L Harder, José Thalles Lacerda, **R Parsons**, [5 authors], H Oster **eLife (2022)**
Rewiring of liver diurnal transcriptome rhythms by triiodothyronine (T3) supplementation.
4. **R Parsons**, SM Cramb, SM McPhail **BMJ Open (2021)**
Clinical prediction models for hospital falls: a scoping review protocol.
5. **R Parsons**, R Parsons, N Garner, H Oster, O Rawashdeh **Bioinformatics (2020)**
CircaCompare: a method to estimate and statistically support differences in mesor, amplitude and phase, between circadian rhythms
6. **R Parsons**, K Newbigin, D Deller, R Edwards, R McBean **Respirology (2019)**
Stonemasons with silicosis: Preliminary findings and a warning message from Australia.

Funding and Awards

1. SuperHERO award winner for outstanding engagement/collaboration. (2021)
2. AWS Activate Winner of the Queensland AI Hub Medical Datathon and \$25,000 AWS credit (2020)
Solution: A deep learning approach to rapid assessment and triage of Chest-X-rays.
3. Digital Health CRC Industry Scholarship Recipient: \$45,000 p.a. for four years during PhD studies. (2020)
